

“I show every visitor to my home here in Indian Rocks Beach, Florida the installed Smart Vents. This is our 5th year of substantial savings. Our first year the insurance carrier wanted \$3,000.00 and after meeting the FEMA requirements and installing SMART VENTS our first Flood Insurance premium was \$375.00.

... My total investment payback was less than 6 months. I am guessing that my situation was an extreme case and I am sure delighted with the product.
