SUBJECT : Congratulations
DATE : March 27, 2003

Gentlemen:

Since the advent of FEMA's regulations regarding flood protection in crawl spaces, we have struggled to find a good method to vent the area and meet the requirements for flood control. Until now nothing has been satisfactory. Smart VENT has proven to be the perfect solution.

Smart VENTS improve the appearance of the building by cutting down on the number of openings needed in the wall while at the same time providing all of the open area needed for adequate ventilation and water flow. Our customers appreciate the fact that Smart VENT's stainless steel construction is maintenance free and eliminates all of their wintertime worries in the crawl space.

Congratulations on a great product!

Very truly yours,

John C. Bruin
